

**SUPERVIZ**

**SuperViz provides programmable  
low-code Collaboration and  
Communication components for  
web applications.**

# Boost Productivity in Every Dimension

Easily add real-time presence, video, and contextual comments to your web app in only days so that you can focus on your core product.

SuperViz provides a complete collaboration SDK and API for developers.

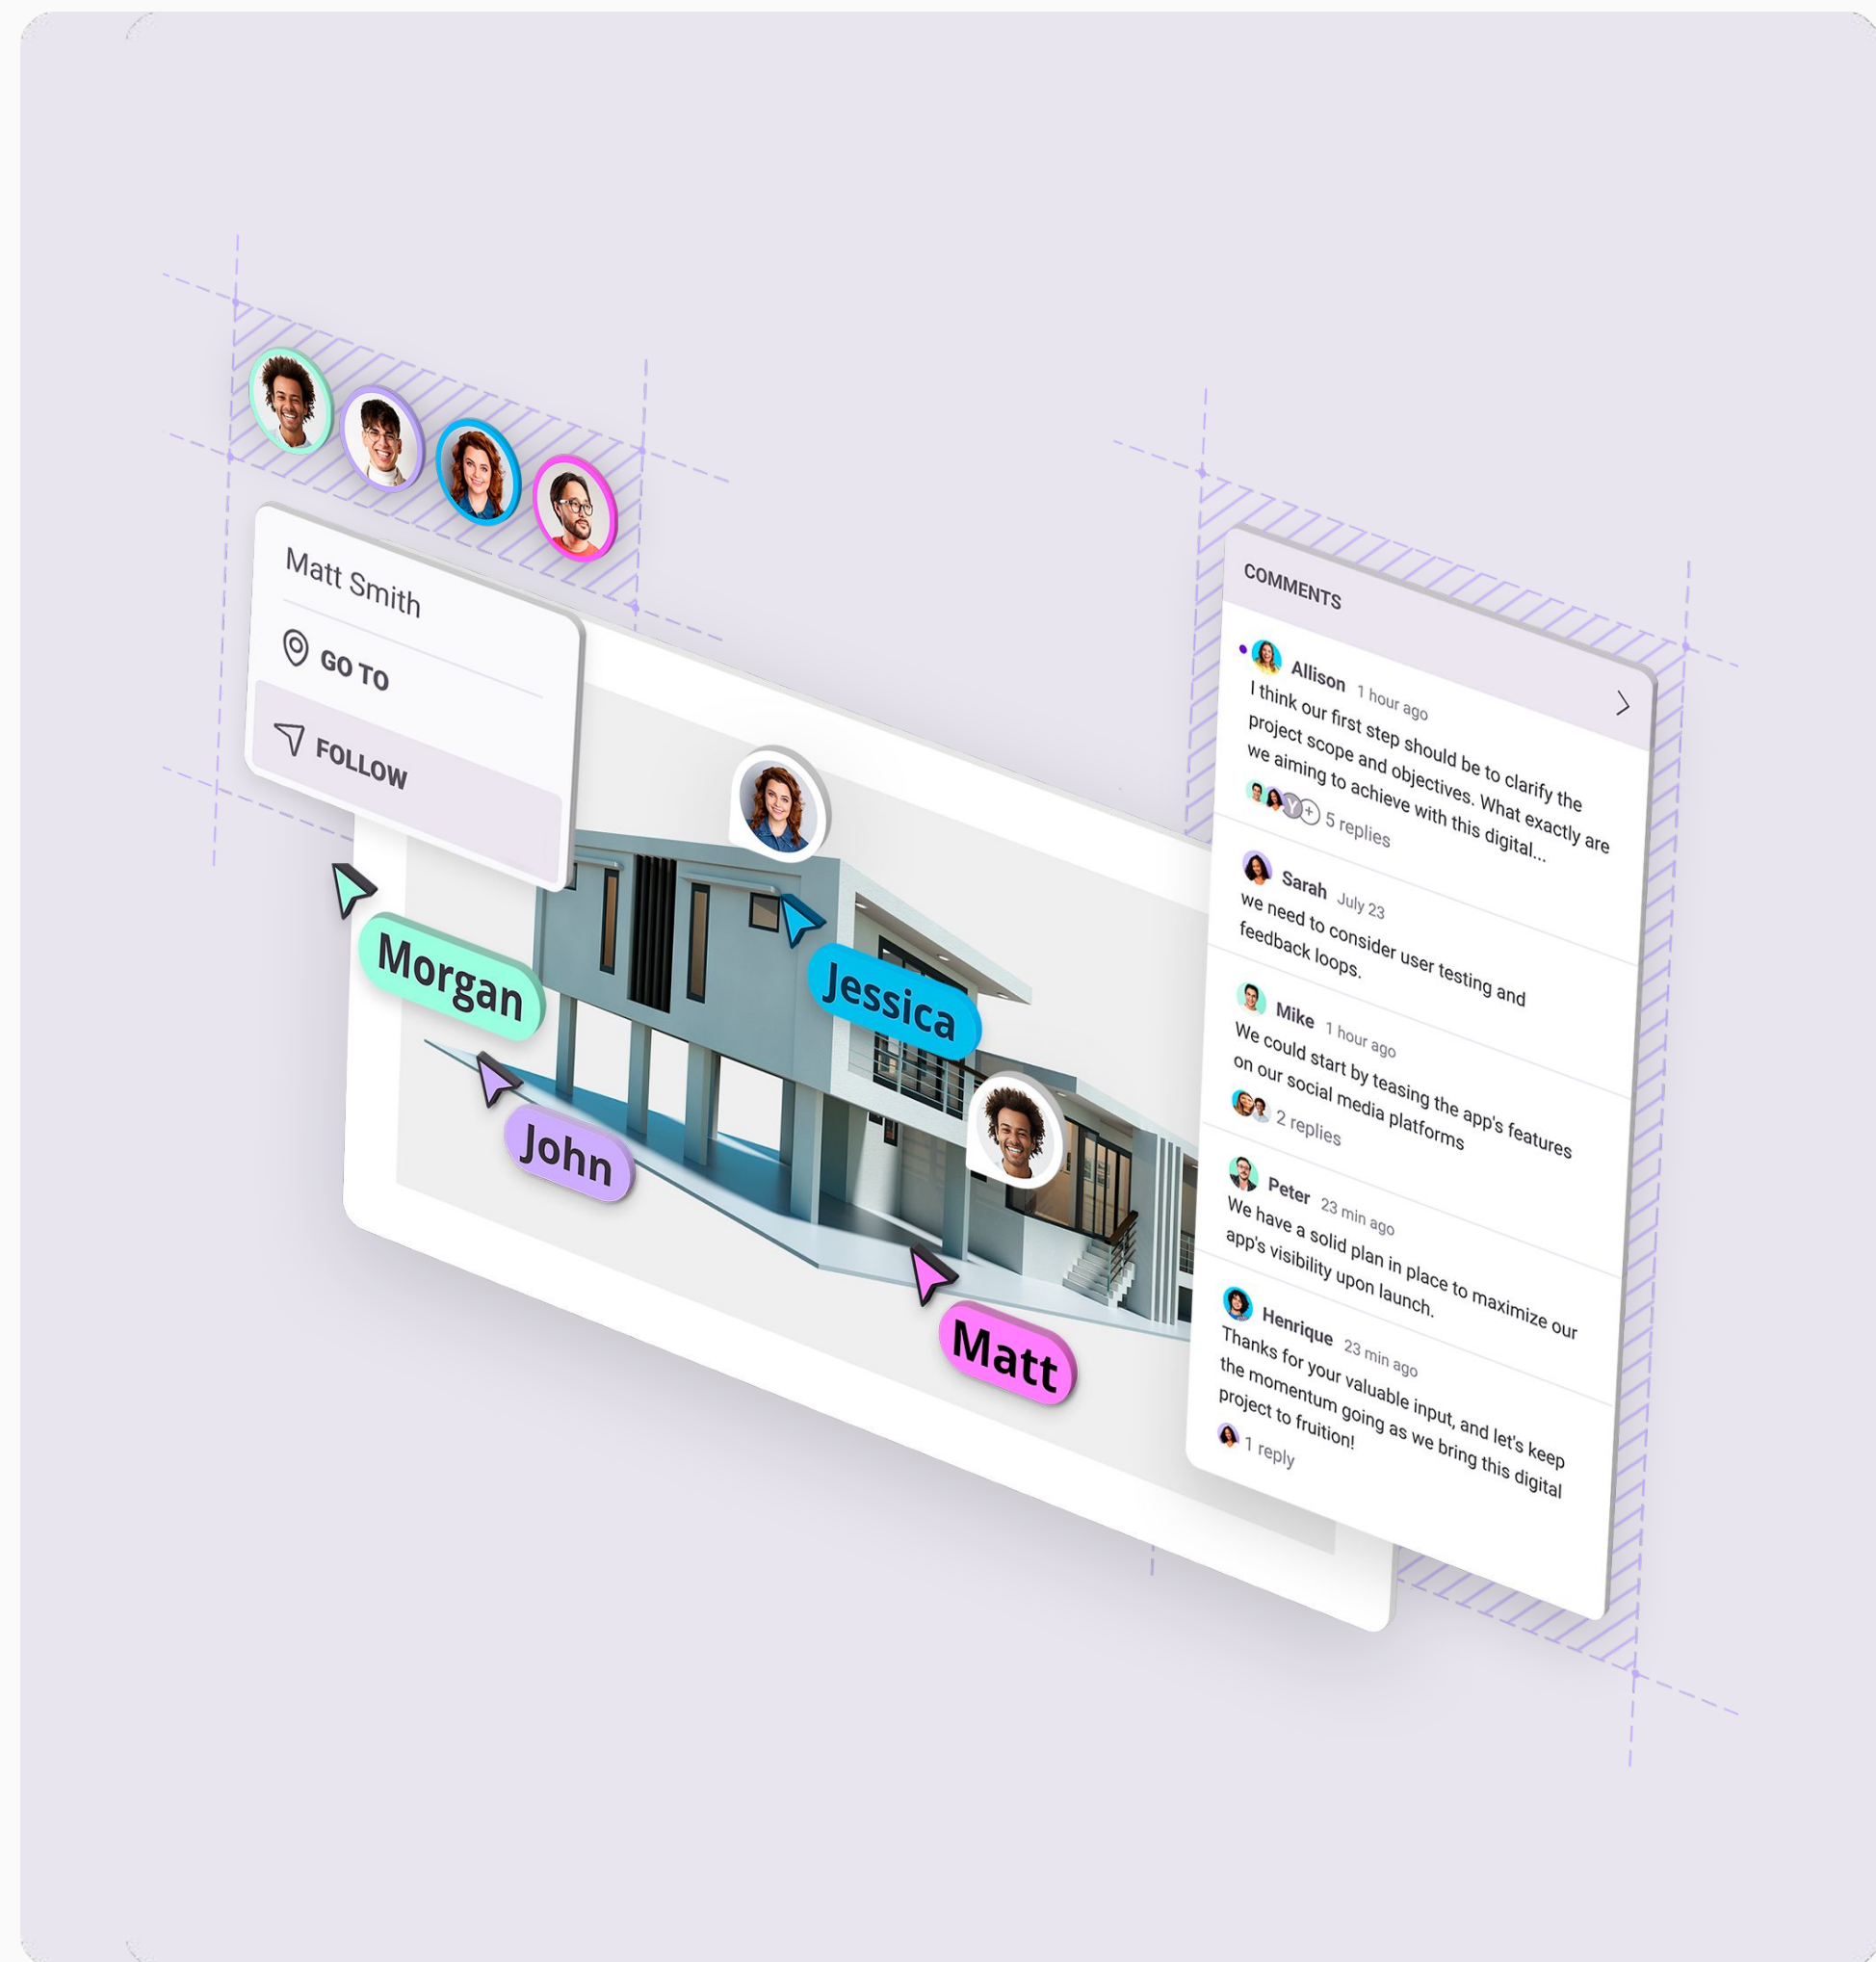

## For Developers, By Developers

Our developer friendly feature-rich API and SDK gets you up and running with just a few lines of code.

# We are the only collaboration SDK that supports 3D content!

Through SuperViz's unique approach, we bring immersive collaboration to 3D models and digital twins. Our specialized plugins ensure dynamic user interaction, setting us apart as leaders in collaboration SDK's.

**Matterport**<sup>TM</sup>

+

**SUPERVIZ**

## Add Collaboration features to Matterport tours

Designed for seamless integration, our plugin elevates the digital twin experience. Integrate features such as avatars, video, contextual comments, real-time pointers and more into Matterport tours.

SuperViz's **Matterport Plugin** ensures you optimize the collaboration experience on the Matterport platform effortlessly.

## Remote Collaboration is trending in the AEC industry

Key players of the AEC market already enable their users to collaborate remotely, synchronously and asynchronously. This new way of working is elevating productivity and expanding the reach for companies that have embraced BIM.

 **AUTODESK**

 **Trimble**

 **onshape**

 **Realitymax**

 | BIMcollab  
**ZOOM**

 **GRAPHISOFT**  
**BIMx**

## Reality capture companies offer collaboration as a feature

Companies in the digital twin and reality capture industries are offering basic collaboration features, such as simple video conferencing, but the experience lacks a sense of presence.

# We've asked our users what do they think about the integration

“

*SuperViz turns Matterport into a Multi-Player Metaverse Experience – it is more fun to explore together and it can enhance the team productivity when discussing things virtually on location. We have also made the experience, that SuperViz Multi-Player visits are better remembered by participants. It leaves a lasting impression.”*

**Florian Wagner, Mesh Images**

“

*Matterport is a tool. Matterport + Superviz is a solution”*

**Dan Smigrod, WGAN**

“

*Superviz adds value to meetings that are normally dull like Teams or Zoom and you can easily lead attendees through a building to show them something.”*

**Michael de Vries, InformAR**

“

*Superviz morphs Matterport into something it's not, a collaborative interactive software. Matterport up until Superviz's innovation was simply a showcase technology of digital twins with very little flexibility.”*

**Abe Truitt, Dive Virtual**

“

*The ability to communicate with over 200 guests and up to 16 main speakers is an astonishing educational and collaborative experience. The truth is the use cases are actually beyond our current imagination.”*

**Tony Pincham, Images for Industry**

“

*Superviz is the most instinctive, natural, and fun way to collaborate within a virtual tour.”*

**Tony Pincham, Images for Industry**

## Meet in Matter

Our recent launch as an example of what can be built with the SuperViz SDK is a free tool to enable 60-min meeting inside any Matterport space.

### Feedback from anonymous users:

*"Great service and first experience!"*

*"Thanks for providing this service and I can't wait to deliver the functionality to my clients."*

*"Awesome experience - 10/10, smooth and reliable."*

*"Amazing new feature! Looking forward to introducing this feature to my customers as soon as possible. My real estate customers in Milan are looking forward to this!"*

*"This is really great!! Excellent for collaboration."*

Participant meetings minutes per month

- ✓ Organic growth in the last 2 months.
- ✓ Positive spontaneous feedback is proving the value it adds to end users.
- ✓ Working as a good lead generator.

WHY PARTNER WITH SUPERVIZ?

# Key advantages of building this partnership

We've built it and tested it, now it's time to boost it through a powerful alliance.

Using a ready-to-go SDK saves precious resources and time.

Access best practices learned from Matterport users already collaborating with SuperViz.

Adds value to all Matterport use cases: Residential Real Estate, Commercial Real Estate, AEC, Insurance, Facilities Management, Travel & Hospitality, Manufacturing, Public Sector.

New feature instantly available to over 700,000 subscribers and to millions of end users creates revenue opportunity.

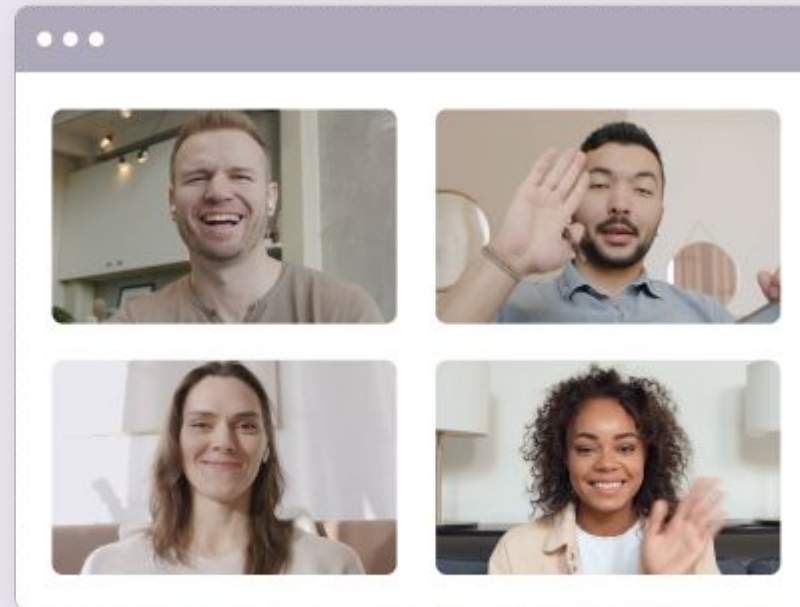

Drive market innovation.

Resolve Discussions

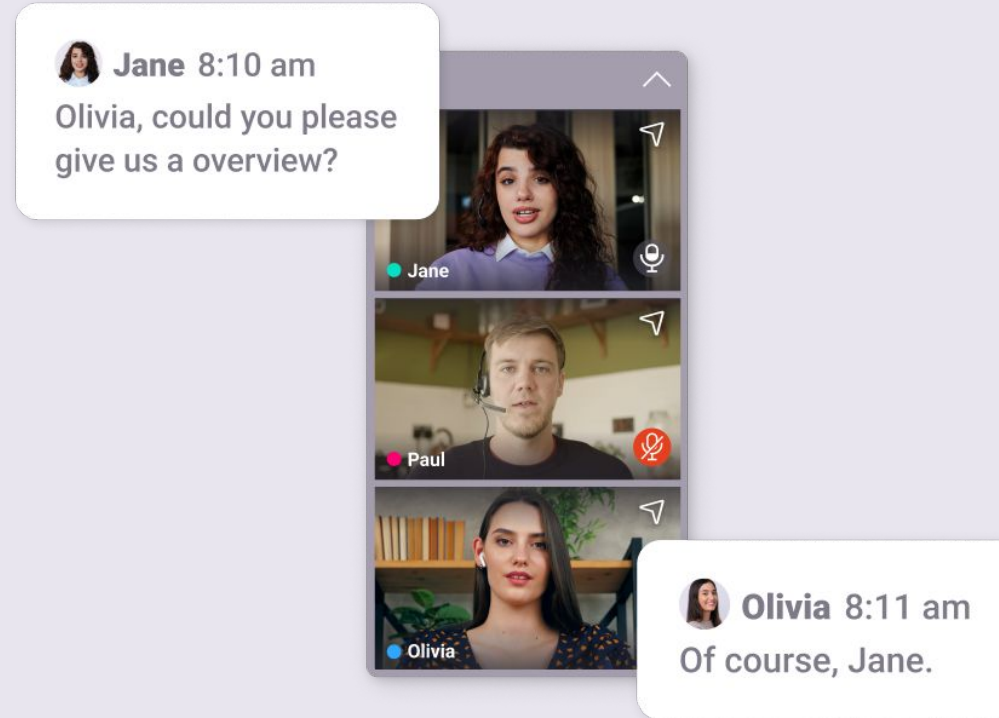

Add comments to any  
element in 2D or 3D space

## PRODUCTS

# Extensions

Maximize the potential of our toolkit with our extensions and plugins

## AI transcripts API

Summarize and analyse conversations

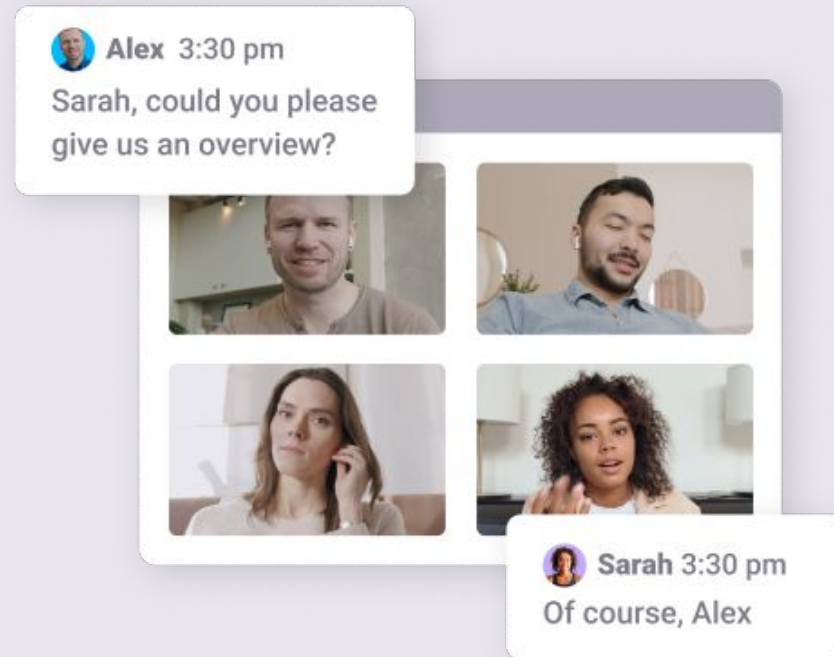

## Realtime data engine

Improve teamwork with real-time app property sync

## EXTENSION

# AI transcript API for video calls

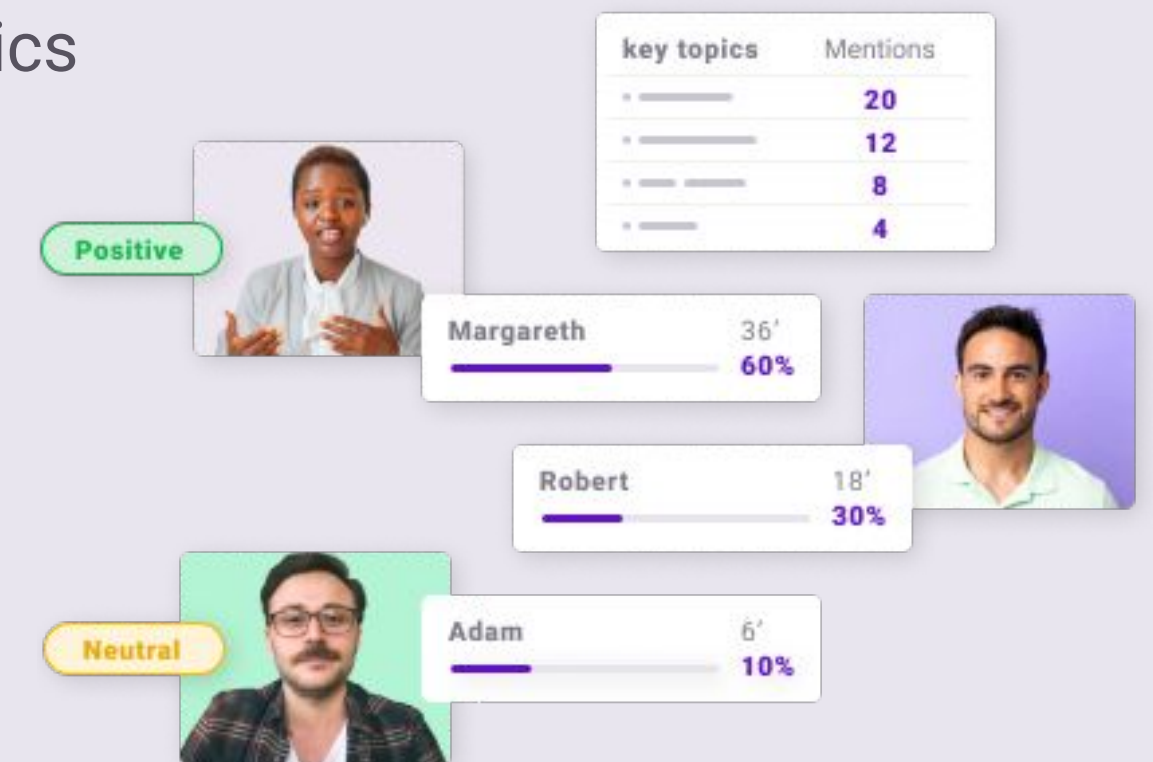

## Utilize AI-driven transcriptions to obtain essential meeting insights

- Pinpoint crucial decisions
- Gather essential data
- Identify context and compile summaries for later analysis

## Insightful Meeting Analysis

- Generate concise summaries
- Capture tasks and actionable items
- Highlight primary discussions
- Monitor individual speaking durations
- Measure conversational engagement time
- Detect raised questions
- Pinpoint discussed topics

## EXTENSION

```
1 import SuperViz from '@superviz/sdk';
2 import { Comments } from '@superviz/sdk/components';
3 import { Presence3D, MatterportPin } from '@superviz/matterport-plugin';
4
5 // Initialize Room
6 const room = await SuperVizRoom(DEVELOPER_KEY, {PARAMS});
7
8 /*
9 Create a presence component and add
10 my matterport SDK instance
11 */
12 const mpPresence = new Presence3D(myMatterportSDK, {params});
13 room.addComponent(mpPresence);
14
15 /*
16 Create a matterport pin component for contextual comments
17 and add my matterport SDK instance
18 */
19 const mpPin = new MatterportPin(myMatterportSDK);
20 const comments = new Comments(mpPin);
21 room.addComponent(comments);
```

# Realtime data engine

## Enhance collaboration

Deliver a complete synchronized digital experience by declaring custom properties that will be synchronized between participants in the same room.

With our SDK we provide a real-time infrastructure to build engaging solutions where your users can truly connect.

## Enhance your platform

Integrated collaboration features for real estate, construction, insurance, virtual staging, tourism and more.

With just a **few lines of code** you can allow your users to meet virtually inside remote spaces to showcase, sell, and collaborate with a sense of presence.

BUILT FOR DEVELOPERS

# All that's needed for developers to swiftly bring ideas to life.

From prototype to product, our tools make it fast and easy for developers.

## Dashboard

Easily track your usage, products, API keys, and more.

## Tutorials & examples

Practical guides designed for a quick start.

## Low code

Seamlessly embed our components with minimal coding.

## GitHub

Public GitHub repositories with support and issue management.

## Responsive design

Our UI elements adapt to any screen size and orientation.

LEADERSHIP TEAM

# Tommy Lindestrøm

CEO

 [linkedin.com/in/tommylindestrom/](https://www.linkedin.com/in/tommylindestrom/)

Experienced director with 15+ years of international leadership in digital product and web development. Tommy's vast experience includes work in Europe, USA and South America.

Tommy started his career as a full-stack developer working at the global IT consulting company Valtech A/S Denmark.

From 2008 to 2016, Tommy served as Technology Director at SuperUber.

Tommy co-founded the Copenhagen based agency The Martians in 2016, a web development services company before joining SuperViz in 2020.

## LEADERSHIP TEAM

# Russ Rive

Founder & Chairman

[linkedin.com/in/russ-rive-90a1261/](https://www.linkedin.com/in/russ-rive-90a1261/)

A serial entrepreneur with experience building enterprise SaaS companies. In 1998 Russ co-founded Everdream, one of the first enterprise SaaS companies, with his brother Lyndon Rive.

Everdream provided a platform for automating desktop management for large distributed enterprises. Everdream was acquired by Dell in 2007.

Russ co-founded SuperUber (2004), a high-tech immersive experience design agency, with Liana Brazil.

Russ founded SuperViz in 2019 to build technologies that bring people together virtually with a sense of presence.

Russ has a background in electronics and software and holds 4 patents in the area of automating remote services through the internet.
